# NATIONAL ANALYTICAL APTITUDE TEST (NAAT)

The NAAT has been conceptualised as a national-level student assessment that seeks to measure students' learning and reasoning capabilities fundamental to what has come to be termed as '21st Century skill-sets'.

The NISA conducts annual assessments for students in participating private schools from across the country. The test will be designed by our knowledge partners **CAMBRIDGE Education Lab & SUMMATIC** and the performance of students will be assessed to select the top 10% performers in the preliminary assessment. The second round of assessment will be conducted for the top 10% of performers, and State, National & International Awards will be declared.

A felicitation ceremony is also proposed to be held in the State Capital and National Capital. The topper students will be invited to the ceremony duly recognized for their talent through Certificates, Awards and Prizes. The NAAT 2023 will also provide an opportunity for the toppers to receive an **International Award at Cambridge, UK**.

The programme proposes to give certificates to all participating schools, students, and teachers coordinators to recognise their dedication to quality improvement, innovation, and an impact on student learning as well as their students' desire to develop the necessary skills to become tomorrow's leaders.

**NAAT 2023 has been designed as a hybrid model with an opportunity for the students to appear online and offline.**

**Out of total fees of ₹ 200/ student, ₹ 30 is to be retained by the school towards invigilation and conduction of the Round 1 Test in school and the remaining ₹ 170/ student is to be paid to NISA Education**
